Narratives**Disaster Damage:**

In October 2015, the City of Columbia, along with much of the State of South Carolina, experienced unprecedented and historical rainfall and flooding resulting from an upper atmospheric low-pressure system that funneled tropical moisture from Hurricane Joaquin. This heavy and extended rainfall exceeded a once in a thousand-year flood event with more than two feet of rainfall in less than 48 hours. The rain and flooding caused extensive damage to many dams, bridges, roads, homes, and businesses in the state's capitol. As a result, approximately 400 homes and 60 businesses received rain and/or flood damage at an estimated value of \$65 million. In addition, the city sustained more than \$75 million in infrastructure losses. Most of the major and severe damages to housing occurred along the banks of Lake Katherine, Central and Lower Gills Creek, Wildcat Creek, and Penn Branch areas of the city. Numerous City of Columbia residents, including many of low-to-moderate income households, were forced to abandon their homes, and many houses were isolated as more than 100 streets were closed, blocked, or impassable. In addition to the damage to private residences and businesses, the city also experienced the total loss of one fire station and training facility.

The flooding also impacted the city's utilities, wastewater treatment systems, and drinking water treatment and collection systems. Due to the fact that the ground surfaces were already saturated from rainfall in September, there were multiple dam failures in the city and a massive breach in the Columbia Canal. Flooding caused a 60-foot section of the Columbia Canal to wash away and caused the water level to drop below the level necessary for the city to pump water into its water treatment facility through normal operations. Additionally, waste water stations were completely submerged and multiple sewer and water lines were ruptured or broken. The canal breach combined with numerous line breaks throughout the water system led to a 10-day disruption of clean drinking water for more than 375,000 citizens who received boil water notices. The flooding and disruption of drinking water severely impacted the operations of the following:

- City Capitol Complex
- Governor's residential compound
- State Agencies
- City Government Agencies
- 5 colleges and 1 major university (40,000 students and 2,000 faculty)
- 5 Hospitals with 2,436 beds (including a Level 1 Trauma Center)
- US military installation -Fort Jackson (3,500 active duty members and 12,000 family members)
- All public, private, and parochial school districts
- Nursing homes and assisted care facilities
- Numerous Banking Institutions, Restaurants, Hotels, Tourist Destinations, and hundreds of other businesses and organizations

This widespread damage to homes, businesses, and critical infrastructure exacted a human toll and disrupting the lives of the citizens of impacted communities in Columbia and across South Carolina who are still recovering.

In Columbia, homes along and near the City's many creeks, lakes, and other waterways were inundated by floodwater causing almost complete destruction of some neighborhoods. Local businesses lost inventory and operations were halted leading to loss of income and wages.

Disaster Damage:

Exacerbating the overall economic loss was the decision to relocate the site of a previously scheduled major college football contest from Columbia's University of South Carolina stadium to the opposing team's stadium. As a result, businesses that were not otherwise impacted by the storm's waters experienced tremendous economic loss.

The federal disaster declaration brought necessary resources from the Federal Emergency Management Agency (FEMA) and the Small Business Administration (SBA) to aid in response and recovery. Due to the scale of the damage, FEMA and SBA's resources, as well as private insurance, have proven insufficient to address all of the losses incurred from the disaster.

HUD's allocation of \$19.989 million in Community Development Block Grant Disaster Recovery (CDBG-DR) funds to the City of Columbia will help the city address some of the direct unmet needs. To illustrate the city's plans for implementation of programs to meet these needs, the City of Columbia has developed the following Action Plan. The plan outlines the proposed use of funds and eligible activities available to assist residents and local businesses to recover from the October 2015 flood event.

Supplemental to the CDBG-DR Action Plan, the City of Columbia submitted all Risk Analysis documentation to include the City of Columbia CDBG-DR Pre-Award Implementation Plan in compliance with PL 114-113 in order to demonstrate sufficient capacity to effectively manage and provide oversight of CDBG-DR funding. Two hard copies and one digital copy of this documentation accompanied with all applicable certifications was submitted to HUD on July 22, 2016 as amended on December 21, 2016.

Recovery Needs:

The CDBG-DR program is considered a "gap" funding source and is intended to assist with recovery needs not covered by other public and private funding sources. While recovery efforts have continued without interruption since October, many impacts remain unaddressed due to several primary factors including: the profound extent and diversity of the damages to housing, infrastructure, and the economy; the unique conditions and vulnerabilities of City of Columbia residents and businesses; and the limitations of available funding assistance. This unmet need assessment provides essential information to better understand the most impacted areas and populations in the City, and guides development of the most effective recovery programs and priorities.

This section describes the City's preliminary assessment of unmet recovery needs resulting from the October severe storm and flooding disaster (DR 4241). When major disasters occur, a significant amount of data and information must be collected and analyzed from numerous agencies, departments, and organizations. Accessing and compiling information on impacts and recovery resources can be a challenge due to varying quality, availability, formatting, and timing of different sources. Estimates of unmet needs are based on the best available information as of July and August 2016, and represent the City's initial calculation of remaining recovery gaps. This assessment should be considered a living document that will be updated as additional information becomes available and Duplication of Benefits analysis occurs during the applicant intake process.

Unmet needs were estimated through a comparison of financial impacts of the qualified disaster event with subsequent recovery funding that has been received or is anticipated. The City of Columbia has worked with the following agencies during the unmet needs assessment and has incorporated data from the following key sources:

Federal Emergency Management Agency (FEMA) Individual Assistance (IA) Program

- FEMA Public Assistance Program (PA)
- Small Business Administration (SBA)
- National Flood Insurance Program (NFIP)
- Columbia Housing Authority (CHA) City of Columbia Building Department
- City of Columbia GIS and Planning Departments
- City of Columbia Consolidated Plan
- City of Columbia Comprehensive Plan
- City of Columbia Building and Permits
- City of Columbia Office of Business Opportunity (OBO)
- South Carolina Emergency Management Department
- Engineering estimates for FEMA PA Projects
- United States 2010 Decennial Census
- 2014 American Community Survey (ACS)
- Volunteer Organizations Active in Disaster (VOAD)
- Public and Stakeholder outreach and feedback

This assessment is organized into three main categories: Housing, Infrastructure, and Economic Development. Identifying and documenting the needs across these three core areas allowed the City to strategically allocate limited resources to address the most critical recovery needs while making proactive resilience investments to minimize impacts of future flood events.

A high-level overview of the unmet needs assessment is shown in Table 13 using the best available data and information as of December 2016. It is critical to understand

Recovery Needs:

and that these figures are initial estimates based on the available information at the time this plan was developed and revised.

Based upon this information, City of Columbia has identified \$120,505,571 million in unmet recovery needs. Although infrastructure is currently shown with the largest gap in funding, the City considers housing the largest unmet need due to the large number of residents impacted by the flood.

Overall	This Report Period	To Date
Total Projected Budget from All Sources	N/A	\$20,989,000.00
Total Budget	\$263,159.00	\$19,989,000.00

Limit on State Admin	\$0.00	\$86,235.17
Most Impacted and Distressed Threshold (Projected)	\$0.00	\$0.00

Overall Progress Narrative:

The Community Development Department will discuss its progress from January 25, 2017, when HUD approved the City of Columbia Action Plan, through June 30, 2017.

- The City executed an Environmental Exemption for administration, planning, project delivery and professional service activities; a Categorical Exclusion Not Subject to 58.5 for its economic development activity; and the FEMA Programmatic Agreement and Amendment to expedite Section 106 historic preservation reviews.
- During this time, the City procured language translation services to meet HUD's requirement that the Action Plan and other program materials be translated to Spanish and made available on the CDBG Disaster Recovery website.
- The City also completed Categorical Exclusions Subject to 58.5 for four separate project activities, published both Early and Final Floodplain Notices, and performed the 8-step analysis for properties located in the floodplain.
- The City developed its program implementation strategy, public outreach materials, and a database application to track key project status parameters such as national objectives, funds expended and remaining, performance measures, and number of applicants, race, and ethnicity and income data.
- In April, the Community Development Department held two staff training sessions to enhance awareness of federal requirements governing CDBG Disaster Recovery activities and discuss program implementation. One session focused on the roles of CDBG Disaster Recovery staff and resources.

available; the second session focused on the roles of other City departments and was attended by representatives from Finance, Purchasing, Legal, Public Relations, Information Technology, Floodplain Management, Building and Engineering, Office of Business Opportunities, Community Development, and the City Manager's office.

- The City continues to collaborate with Disaster Recovery staff from Richland and Lexington Counties, the Midlands Recovery Group, Hearts and Hands, and the Council on Governments.
- On May 16th a copy of the implementation strategy power point was presented to City Council. The presentation was also uploaded to the City's Disaster Recovery website along with the outreach materials that included individual program brochures for all five housing programs, a grant process flow chart, and a pre-application form.
- On May 19, the City mailed letters to 260 prospective applicants assessed with major or severe damage inviting them to attend one of two public outreach meetings and schedule appointments with a case manager to complete a program application. Letters included a program flyer that outlined the meeting agenda and highlighted the dates, times and addresses of both meetings. We also contacted by phone 65 individuals who had called to request program information and invited them to attend or make an appointment with a case manager.
- The first session was held on Wednesday, May 31 from noon until 2 pm at the Kilbourne Park Baptist Church. Thirty-seven (37) people attended, provided contact information, and completed the pre-application form. The second session was held on Thursday, June 1 from 5:30 – 7:30 pm at the Greenlawn Baptist Church. Twenty people attended, provided contact information, and completed the pre-application form.
- Some attendees chose not complete the pre-application after learning about the income criteria for the rehabilitation programs; several expressed interest in the buyout program; most questions concerned the buyout process and how home values would be assessed. Several asked questions about repairs that have already been completed. We expected this to be the case based on the income levels in these severely impacted neighborhoods.
- In the month of June case managers met with 109 homeowners; of that number 14% are Low Income, 14% are very low income, 29% are ELI, 32% are not LMI, 11% have not provided documentation; eligibility reviews have been completed for 47 applicants; 14 additional homeowners have applied for the buyout program, of which 10 have been referred for appraisals.
- On June 26 the CDBG Disaster Recovery staff mailed letters and outreach materials to approximately 1200 homeowners assessed by FEMA as having sustained minor damage as a result of the October 2015 flood and identified by FEMA as a low-moderate income household.
- Additional outreach sessions were scheduled in early Jul; two in each of the city's four Council Districts.
- On June 1st the Office of Business Opportunities mailed disaster recovery assistance questionnaires to 75 commercial businesses that previously applied to FEMA/SBA. These businesses may be eligible for a forgivable loan up to \$20,000 and forgivable (33.3%) each year, for 3 years under the Small Business Disaster Recovery Program. The response deadline is Friday, June 23, 2017.

Activity Description:

Administration for CDBG-DR including salaries and administrative costs required to successfully manage DR funding and implement DR programs and activities.

The City of Columbia has incurred pre-award and pre-agreement costs of \$231,300 for the following activities:

- Translation Services - \$ 3,200
- DRGR Grant Reporting Training - \$3,100

- CDBG-DR Administrative Set-Up - \$225,000

The City of Columbia Action Plan was approved on January 24, 2017. The office of Community Development is completing a Tier I Environmental Review. It's Tier II site specific environmental review will occur when eligible addresses have been identified.

Location Description:

City of Columbia Community Development Department, 1225 Lady St. Columbia, Suite 102, SC 29201 is the administrative address where DR funding and program oversight occurs. The DR program will be invested throughout the City limits of Columbia and focusing on the areas that were severely impacted by the 2015 Flood Disaster.

Activity Progress Narrative:

The City has not completed any monitoring events this quarter, but will monitor case files monthly to identify issues relating to eligibility reviews, DOB verification, property ownership verification, income verification and verification of complete documentation in file. During the reporting period the City hired three case managers, provided the necessary equipment and furnishings, and conducted two CDBG Disaster Recovery training sessions; one for Disaster Recovery staff and one for city departmental managers.

Activity Description:

The proposed Columbia Homeowner Assistance Program (CHAP) will be administered by the city's Community Development Department. The program will provide up to \$150,000 to assist owner-occupied households with "Major-High" and "Severe" damages directly related to the October 2015 rain and flood event for properties with unmet needs exceeding \$25,000. The program will also provide assistance to meet elevation requirements where required. Only LMI households will be assisted. Project Delivery costs are included within this budget.

Location Description:

Eligibility requirements for participants in this program are as follows:

- Damaged residential dwelling must be located within Columbia City Limits.
- Applicants must have owned and occupied the damaged property as their primary residence as of and prior to the date of the storm event (October 2015).

- Applicants must have registered with FEMA and had their primary residence designated as having sustained Major-High or Severe damages.
- Damaged residence must be a single-unit structure, duplex, townhome, or condominium.
- Application for and receipt of ICC funding for elevation, if required.
- Sufficient gap financing if required.

Match Contributed	\$0.00	\$0.00

Activity Description:

The ERP will assist LMI homeowners that sustained severe damages with significant repair and reconstruction costs due to newly adopted elevation requirements. Eligible owner-occupants at the time of the flood, who have initiated elevation of their damaged structure in accordance with Columbia floodplain requirements prior to the one year anniversary of the flood disaster, will be provided up to \$20,000 in reimbursement of CDBG-DR funding.

The city recognizes that owners of "severely" damaged homes have incurred significant repair and reconstruction costs due to newly adopted elevation requirements and is committed to offsetting increased recovery costs for homeowners who were required to rebuild more resilient homes in order to prevent future losses. Eligible owner-occupants who have initiated elevation of their damaged structure in accordance with City of Columbia floodplain requirements will be provided up to \$20,000 in reimbursement of CDBG-DR funding. It is envisioned that this funding coupled with \$30,000 in ICC funding will relieve some of the recovery burdens for households in the most impacted areas of the city.

Project Delivery costs are included within this budget.

Location Description:

The damaged structure must be within in the City of Columbia limits and within the floodplain. The most impacted areas with severe damages to housing occurred along the banks of Lake Katherine, Central and Lower Gills Creek, Wildcat Creek, and Penn Branch areas of the City.

City of Columbia	\$0.00	\$0.00
Most Impacted and Distressed Expended	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

The MRP will assist low-mod income owner-occupied households that sustained Minor-Low and Minor-High damages if remaining repair needs have not been covered by the FEMA IA Program, SBA, homeowners insurance, or other forms of assistance. Funding is up to \$25,000 and flood damages must tie-back to the October 2015 Flood Disaster. Project Delivery costs are included within this budget.

Location Description:

For the MRP, homeowners with damaged property within Columbia City limits, must have owned the property as their primary residence as of and prior to the date of the storm event (October 2015).

Activity Description:

The proposed City of Columbia Small Rental Repair Program (SRRP) will be administered by the city's Community Development Department. The program will provide funding to assist with the repair of storm damaged rental properties located outside of the floodplain. The primary goals of SRRP are to assist property owners who agree to rent to LMI individuals and families at affordable rates in repairing and reconstructing storm damaged rental units. This program will also provide displaced rental households – including those not registered but who can provide evidence of storm damage - with affordable housing opportunities within the City of Columbia. The SRRP will assist property owners who rent to LMI individuals and families at affordable rates, with repairs and reconstruction of storm damaged rental units. Rental property owners will be required to sign a grant agreement requiring that all rehabilitated units remain affordable (50-80% of the Fair Market Rate (FMR)) for a 3-year period. Rental complexes with four units designated as a "substantially rehabilitated building" will be provided with broadband infrastructure.

Project Delivery costs are included within this budget.

Location Description:

The SRRP will be for rental properties located within Columbia City limits and damages must tie-back to the October 2015 Flood Disaster. Funding will assist with repair of storm damaged rental properties located outside of the floodplain. For the purpose of SRRP, small rental properties are those with one to four rental units, which include single family, duplex, triplex and quadraplex buildings on one tax parcel.

Match Contributed	\$0.00	\$0.00

Activity Description:

The Buyout Program is a voluntary program designed to reduce the risk from future flooding of residential properties located in the floodway or floodplain that sustained Major-Hi or Severe damages in the 2015 Flood Disaster. The purchase price is based upon pre-disaster Fair Market Value (FMV). 13 LMI households will benefit.

Severely damaged homes, particularly in SFHA, are a health and safety risk to the community. The City recognizes that the loss of rental units is significant as the city has a limited amount of affordable housing making it more difficult for renters to adapt to post-flooding conditions. By encouraging homeowners and landlords with damaged units in the flood plain, where there is a high risk of additional disasters, to participate in this Buyout program, the city is reducing the impact of future disasters and encouraging resettlement in one of its nine areas targeted for revitalization and redevelopment, thus extending its long-term vision for a healthy, vital community.

Project Delivery costs are included within this budget.

Location Description:

The damaged owner occupied or rental dwelling unit must be located within Columbia City limits in a designated floodway or floodplain. This voluntary program seeks to reduce the risk from future flooding by purchasing contiguous residential properties located in the floodway or floodplain that sustained "Major-High" or "Severe" damages. LMI owner-occupants and owners of rental properties where damages pose a health or safety hazard will receive top priority for funding. The purchase price of these properties will be based upon pre-disaster Fair Market Value (FMV). All residential properties acquired will be demolished and dedicated in perpetuity to a public use that is compatible with open space, recreation, natural floodplain functions, ecosystem restoration, or wetlands management practices. Program funds will also be used for property disposition costs, as necessary.
